

Factorial Network

Factorial Network: Revolutionizing the Crypto Landscape

Abstract:

Factorial Network is a cutting-edge cryptocurrency platform that integrates mining, NFTs, and a plethora of features to offer users a seamless and rewarding experience. Starting as a Progressive Web Application (PWA) in February 2023, Factorial Network has rapidly evolved to include iOS/Android apps, KYC functionality, an internal exchange, and soon, a token on the Binance blockchain. This whitepaper outlines the journey, features, and vision of Factorial Network, including its roadmap for the future.

Introduction:

Factorial Network emerged from a vision to create a dynamic and inclusive platform that harnesses the power of blockchain technology. Our journey began in February 2023 with the launch of our PWA, followed by the introduction of mobile apps, KYC integration, and an internal exchange. Our commitment to innovation led us to explore the Binance blockchain, where we are set to launch our token by March 2024.

Platform Overview:

Factorial Network offers a multifaceted approach to cryptocurrency, combining mining, NFTs, and a robust ecosystem of features. Our mining system rewards users based on their level, user base, and remaining coins to be mined. Additionally, users can enhance their rewards by opening boxes at regular intervals, adding an element of excitement to the mining process.

In line with our commitment to security, we have implemented a KYC feature to safeguard user identities and transactions. This feature adds an extra layer of protection and builds trust within our community.

Our upcoming Trade and Exchange feature will enable users to sell their usernames as NFTs, further enhancing the value proposition of Factorial Network. By leveraging blockchain technology, we empower users to tokenize their digital identities and assets, opening up new avenues for creativity and value exchange.

Transition to Binance Blockchain:

By transitioning to the Binance blockchain, Factorial Network aims to unlock new possibilities and scalability for our platform. Users who have purchased Factorial coins will have the opportunity to convert them to Factorial tokens on the Binance blockchain by providing their wallet address. Additionally, non-coin holders will receive 10% of the coins in the first month, with a monthly distribution of 5%.

To maintain the integrity of our platform, inactive accounts will be disabled, and their coins will be permanently blocked. This measure ensures that active participation is rewarded while discouraging dormant accounts.

Roadmap and Future Vision:

Factorial Network is committed to continuous improvement and expansion. Our roadmap includes listing on exchanges in March-April 2024, further enhancing liquidity and accessibility for our users. Mining operations will cease in first of 2024 March till 15th of 2024 March, and boxes that reward miners will stop forever, marking a transition towards a more sustainable ecosystem.

By June 2024, we anticipate the completion of our blockchain, paving the way for enhanced functionalities and scalability. Looking ahead, we envision Factorial Network as a versatile platform supporting trading, gaming, wallets, NFTs as usernames, and

even serving as a stable value by 2025. Our goal is to facilitate easy online payments and empower users to harness the full potential of cryptocurrency.

Conclusion:

Factorial Network represents the future of cryptocurrency, combining innovation, security, and inclusivity to create a dynamic and rewarding platform. With our upcoming transition to the Binance blockchain and a roadmap focused on growth and expansion, we invite users to join us on this exciting journey. Together, we will explore the endless possibilities of blockchain technology and redefine the crypto landscape.

Join us at factorialnetwork.com and be a part of the Factorial revolution!

The landing page features a dark background with a white Factorial logo at the top center. Below the logo is a welcome message from Factorial Network, describing the platform's mining and NFT features. A section titled 'Factorial Projects' lists services like NFT Support and Payment Support. A 'Buy Factorial coin right now' section includes buttons for purchasing with various cryptocurrencies. A row of logos for partner exchanges (Binance, KuCoin, Bybit, etc.) is displayed. A 'Factorial Road-Map' section shows a timeline of milestones from February 2023 to April 2024. At the bottom, there is a call to action to contact the support team.

Factorial Network Welcome to the Factorial Network, a platform that combines the excitement of mining and the potential of NFTs. Miners on our platform will be able to gain coins based on their level, number of users, and the remaining coin to mine, with an added opportunity to increase their rewards by opening boxes every 15 minutes. In addition, our platform will soon offer a KYC feature for added security, as well as a Trade and Exchange feature that will allow members to sell their usernames as NFTs. Join us on this journey as we explore the possibilities of blockchain technology. [Only available for mobile devices.](#)
